

In cooperation with CEMBO consortium CU Team has implemented successfully gender equality impact in practice. All scientific projects that have been performed by the CU team have considered this aspect. In addition, the experiences have also been implemented in the management of the workplace where the CEMBO project has been carried out. Comenius University in Bratislava has learnt how to balance the gender, discrimination & sexual harassment in compliance with the EC's strategy. These rules have also been adopted by CU CEMBO partner. Although Slovakia has a conservative approach towards these issues, at Comenius University, the knowledge has been obtained. In the aspect of promotion, there is still a need to continue the course of setting conditions for a fair environment.
